SUMMARY

DevOps-focused engineer with hands-on experience in production support and infrastructure automation. Skilled in building CI/CD pipelines using GitHub Actions, containerizing applications with Docker, and provisioning cloud resources using Terraform on AWS and Azure. Strong foundation in Linux, monitoring, and system reliability, actively transitioning into a full-time DevOps role.

CORE COMPETENCIES

- CI/CD Pipelines
- Docker & Containerization
- AWS & Azure
- Terraform (IaC)
- Ansible (Automation)
- Linux Administration
- Git & GitHub
- Monitoring (CloudWatch)
- Networking Basics

PROFESSIONAL EXPERIENCE

HCL Technologies, Lucknow, India.

Senior Analyst | Oct 2024 – Present

- Managed and supported production systems ensuring high availability (99.9% uptime)
- Troubleshoot application and infrastructure issues using Linux tools and log analysis
- Participated in deployment and release activities, ensuring smooth production rollouts
- Performed root cause analysis (RCA) for recurring issues, improving system stability
- Identified and proposed automation opportunities, reducing manual effort.

Analyst | Feb 2023 – Sept 2024

- Managed system support workflows and resolved application incidents
- Assisted in monitoring, debugging, and incident management
- Ensured minimal downtime through timely issue resolution
- Supported deployment validation and post-release monitoring

Taxtron Technologies Pvt Ltd

Software Developer | Dec 2021 – July 2022

- Developed backend application logic and supported deployments
- Performed testing and validation before release
- Collaborated with teams to deliver customized solutions
- Troubleshoot production issues and improved performance

PROJECTS

- CI/CD Pipeline on AWS: Automated Docker build and deployment to EC2 using GitHub Actions.
- AWS Automation with Ansible: Developed reusable playbooks ensuring consistent server configuration.
- Dockerized Deployment: Containerized applications for consistent environments and reliable delivery.
- Monitoring with CloudWatch: Implemented logs, metrics, and alerts for system health monitoring.
- Portfolio Deployment (shubhdixit.cloud): Automated deployment using GitHub Actions and Netlify.
- Terraform Azure Automation: Provisioned infrastructure using reusable Terraform configurations.

EDUCATION

Bachelor of Computer Applications (BCA)

Lucknow Public College of Professional Studies | 2021
