PROFESSIONAL SUMMARY

Result-oriented DevOps Engineer with over 4 years of experience specializing in infrastructure automation, cloud orchestration, and production reliability. Proficient in designing enterprise-grade CI/CD pipelines using GitHub Actions and Azure DevOps, managing containerized workloads with Kubernetes (EKS/AKS), and implementing Infrastructure as Code (IaC) via Terraform. Strong expertise in Bash/Shell scripting to eliminate manual toil and implementing comprehensive Observability frameworks with Prometheus and Grafana to ensure 99.9% system availability.

TECHNICAL SKILLS

- Cloud Platforms: AWS (EC2, S3, RDS, EKS, CloudWatch), Azure (AKS, Azure Pipelines)
- Containerization & Orchestration: Docker, Kubernetes (K8s), Helm Charts
- Infrastructure as Code (IaC): Terraform, Ansible
- CI/CD Tools: GitHub Actions, Azure DevOps, Git/GitHub
- Automation: Bash & Shell Scripting, Python (Basics)
- Observability & Monitoring: Prometheus, Grafana, CloudWatch, ELK Stack
- OS & Networking: Linux Administration (Ubuntu, RHEL), Networking (TCP/IP, DNS, VPC)

PROFESSIONAL EXPERIENCE

HCL Technologies, Lucknow, India

Senior DevOps Automation Engineer (Senior Analyst) | Oct 2024 – Present

- Architecting robust CI/CD pipelines using GitHub Actions and Azure DevOps to automate the lifecycle of microservices, reducing deployment lead time by 40%.
- Managing large-scale container orchestration using Kubernetes (EKS/AKS); implemented Horizontal Pod Autoscaling (HPA) and Ingress controllers to optimize resource utilization.
- Developing reusable Terraform modules for multi-cloud infrastructure provisioning, ensuring environment parity across Dev, Staging, and Production.
- Establishing an enterprise Observability stack using Prometheus and Grafana; created custom alerting rules and dashboards to monitor cluster health and application latency.
- Spearheading Docker-based containerization strategies, implementing multi-stage builds to optimize image size and improving security scanning within the pipeline.

- Providing L1 production support and performing Root Cause Analysis (RCA) for infrastructure incidents, maintaining 99.9% uptime for business-critical applications.

Analyst – Infrastructure Support | Feb 2023 – Sept 2024

- Automated repetitive system administration tasks, log rotations, and daily health checks using Bash and Shell Scripting, reducing manual operational effort by 25%.
- Monitored and debugged complex application incidents using Linux CLI tools (grep, awk, sed, top) and log analysis to ensure minimal downtime.
- Supported deployment validation and post-release monitoring using AWS CloudWatch, ensuring stable production rollouts.
- Implemented automated backup scripts using Shell to ensure data integrity and disaster recovery readiness.

Taxtron Technologies Pvt Ltd, India

Software Developer & Automation Assistant | Dec 2021 – July 2022

- Developed backend logic for web applications while automating local development environment setups using Shell scripts.
- Collaborated with the infrastructure team to integrate automated testing scripts into the deployment workflow.
- Troubleshoot performance bottlenecks and optimized server configurations through advanced Linux system tuning.

KEY PROJECTS

- End-to-End K8s Orchestration: Deployed a scalable microservices architecture on AWS EKS using Helm for package management and Prometheus for monitoring.
- Hybrid Cloud IaC: Provisioned a secure VPC and Virtual Network architecture across AWS and Azure using a single Terraform codebase.
- Zero-Downtime Deployment: Configured Blue-Green and Canary deployment strategies in Azure DevOps to ensure high availability during feature releases.

EDUCATION

Bachelor of Computer Applications (BCA)

Lucknow Public College of Professional Studies | 2021
